

NEETESH KUMAR NAMDEV

Cloud Engineer | AWS Certified Solutions Architect – Associate | DevOps & Automation Exposure

+91 7089122618 • n.namdev.nn@gmail.com • linkedin.com/in/neetesh-kumar-namdev-56706517a

PROFILE SUMMARY

AWS Certified Solutions Architect – Associate (SAA-C03) and Cloud Engineer with 2+ years of hands-on experience managing and supporting AWS production environments at Tata Consultancy Services (TCS). Core strength in EC2, VPC, IAM, S3, RDS, Route 53, and Auto Scaling, with practical exposure to DevOps tools and practices — Docker, Kubernetes (Amazon EKS), Jenkins, Git/GitHub, GitHub Actions, and Infrastructure as Code (CloudFormation). Delivered measurable impact — a 20% gain in server efficiency, 30% reduction in downtime, and 25% improvement in system performance — through proactive monitoring, automation, and ITIL-aligned incident and change management. Seeking Cloud Engineer / DevOps Engineer (Associate) roles to apply AWS production operations expertise alongside developing automation and CI/CD skills.

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS)

AWS Services: EC2, VPC, IAM, S3, EBS, EFS, RDS, DynamoDB, Aurora, Route 53, Lambda, Elastic Load Balancer (ALB/NLB), Auto Scaling, Elastic Beanstalk, CloudFront, Glacier, EMR, AWS Glue, API Gateway, AWS Systems Manager (Patch Manager, Session Manager, Run Command), AWS Backup, AWS CLI

Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Amazon ECS

DevOps Tools: Jenkins, GitHub Actions, AWS CodePipeline, AWS CodeBuild, AWS CodeDeploy

Infrastructure as Code: AWS CloudFormation, YAML

CI/CD: CI/CD Pipelines, Jenkins, GitHub Actions, CodePipeline, CodeBuild, CodeDeploy

Version Control: Git, GitHub

Monitoring & Logging: Amazon CloudWatch, AWS CloudTrail, AWS Config, Amazon SNS, Amazon SQS, AWS X-Ray

Operating Systems: Amazon Linux, Ubuntu Linux

Scripting: Bash / Shell Scripting, Python (Basic), YAML

Ticketing & Process: ServiceNow, ITIL (Incident, Problem & Change Management)

Networking: VPC Design, Subnets, Route Tables, NAT Gateway, Internet Gateway, Security Groups, NACLs, Route 53 (DNS), Elastic Load Balancer

Security: IAM, KMS, WAF, GuardDuty, Secrets Manager, Security Hub, Security Groups

WORK EXPERIENCE

Cloud Engineer — Tata Consultancy Services (TCS)

May 2024 – Present

- Managed AWS production infrastructure — EC2, VPC, IAM, Route 53, Auto Scaling Groups, and Elastic Load Balancers — sustaining 99.9% application uptime and improving server efficiency by 20%.
- Automated routine operational tasks and infrastructure provisioning using AWS Systems Manager (Patch Manager, Session Manager, Run Command), AWS Lambda, and Bash scripting, with basic Python used for supporting scripts.
- Supported CI/CD deployment activities and production infrastructure changes using AWS CodePipeline, CodeBuild, and CodeDeploy, with additional working exposure to Jenkins and GitHub Actions.
- Assisted with containerized workload support on Amazon EKS and ECS, including basic Docker-based deployment and troubleshooting for microservices.
- Configured and secured VPC environments — subnets, security groups, NACLs, NAT Gateways, and Route 53 DNS routing — aligned with AWS Well-Architected best practices.
- Monitored infrastructure health via CloudWatch dashboards, alarms, and SNS alerting; resolved production incidents within SLA, improving overall system performance by 25%.

- Administered Amazon RDS and DynamoDB with automated backups (AWS Backup) and performance tuning, cutting system downtime by 30%.
- Executed infrastructure changes through ServiceNow Change Management following ITIL practices; handled Incident, Problem, and Change Management while maintaining SLA compliance.
- Managed IAM policies, roles, and API Gateway integrations to enforce cloud security best practices.
- Delivered L2 Linux system administration — server troubleshooting, performance tuning, and patch validation — using Bash and version-controlled configuration via Git/GitHub.
- Collaborated with application, database, and network teams during deployments and incident resolution, strengthening cross-team reliability.

KEY CONTRIBUTIONS

- Rightsized production resources and automated provisioning with CloudFormation (IaC), strengthening change-management workflows and improving server efficiency by 20%.
- Built CloudWatch dashboards, SNS alerts, and automated runbooks that reduced system downtime by 30%.
- Implemented Linux performance-tuning and L2 troubleshooting workflows that lifted overall system performance by 25%.
- Built and maintained ETL pipelines using AWS EMR, Glue, and S3-based storage design to support downstream reporting and analytics workloads.
- Managed IAM policies and roles alongside ServiceNow-driven Incident, Problem, and Change Management to keep production changes compliant and audit-ready.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03) — Completed, July 2026
- AWS Certified – Cloud / Associate Level — Completed
- AWS CloudWatch Certified (AWS-CWI) — Completed
- Certified Linux Administrator — Completed

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

University Institute of Technology, Bhopal — 2023

LANGUAGES

English (Fluent), Hindi (Native), Japanese (Working Knowledge)
